United States Department of Agriculture
Office of Information
Division of Photography

USDA PHOTOGRAPHS

This is a revised index guide of black and white photographs available from the Division of Photography, Office of Information, USDA. Map and chart negatives issued by several agencies of the Department are also on file but have not been included in this listing. A catalogue of filmstrips and a listing of several thousand color transparencies are also available on request.

New photographs will be integrated into the Library file and this list will be revised again at a later date.

When visiting the Department, you are invited to review this central photographic service. The Library is located in the Administration Building, Room 412. It is open Monday through Friday, 9:00 a.m. to 5:30 p.m.

The Department of Agriculture is authorized by law to sell copies of photographs obtained in connection with its authorized programs. A limited number of photographs will be sent on request to magazine and newspaper editors without charge. Photographic reproductions may be obtained by writing direct to the Division of Photography, Office of Information, Washington 25, D. C. Our current price list is attached.
